

Shining Star Therapy Family Counseling

At Shining Star Therapy, LLC, our passion is helping infants/toddlers, Early Intervention patients (0-3 years old), and children up to 12 years of age reach their full potential via in-home and daycare therapeutic services. Our Physical, Occupational, Speech, and Developmental Therapists help children work through mobility, language, or functional issues, and Our Child & Family Counselors can coach the whole family through the journey of working with a special needs child.

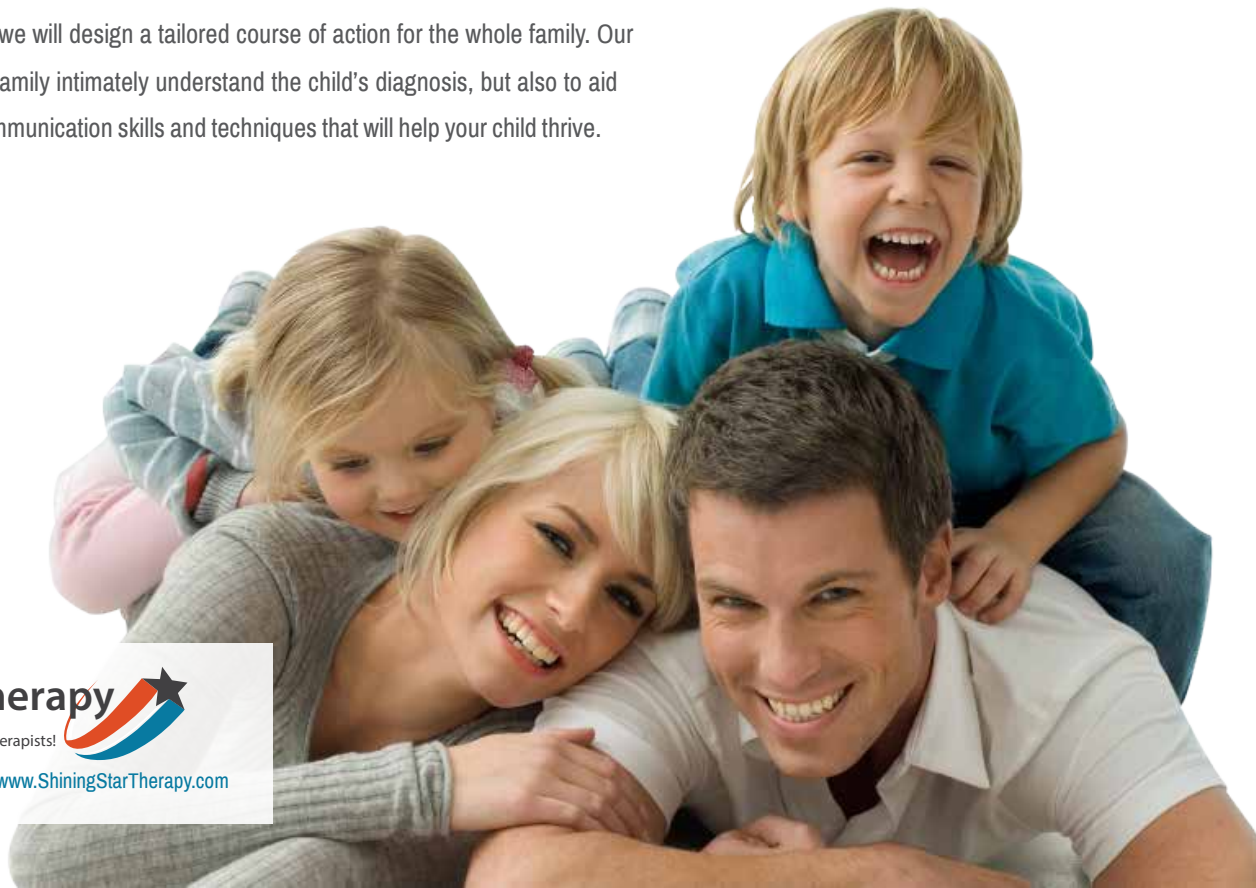

Our Professional Counseling Philosophy

Our Licensed Clinical Professional Counselors (LCPCs) provide a range of family counseling services to help the entire support network of children with special needs. We empathize with the complicated issues that families face when it comes to a child's behavior, communication style, and developmental level, and we work hard to provide your family with the tools to understand and assist your child throughout his or her growth.

Working with children and their families in the comfort of their own home, our LCPCs focus heavily on developing the social-emotional skills of the child while carefully imparting our knowledge and techniques to the entire family. Depending on the child, we may use one of a variety of evaluation methods and treatment models. These include the Achenbach Child Behavior Checklist, Carey Temperament Scales, Early Coping Inventory, Functional Emotional Assessment Scale (FEAS), Infant-Toddler Social and Emotional Assessment (ITSEA), Temperament & Atypical Behavior Scale (TABS), and the Vineland Social Emotional Early Childhood Scale.

After our careful evaluation, we will design a tailored course of action for the whole family. Our goal is not just to help your family intimately understand the child's diagnosis, but also to aid your family in developing communication skills and techniques that will help your child thrive.

ABOUT SHINING STAR THERAPY

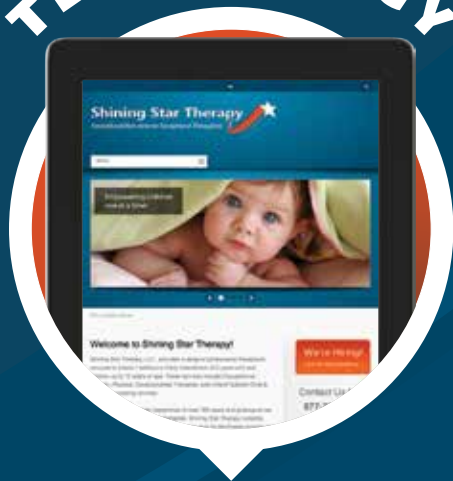

Shining Star Therapy, LLC., provides a range of professional therapeutic services to infants / toddlers in Early Intervention (0-3 years old) and children up to 12 years of age. These services include Occupational, Speech, Physical, Developmental Therapies; and (Infant/Toddler) Child & Family Counseling services.

Less time in paperwork,
**more time working
with children.**

With a combined clinician experience of over 100 years and growing as we consistently hire experienced therapists. Shining Star Therapy currently services seven counties in the Chicago area and the Northwest suburbs of Illinois.

Our team works with infants, toddlers and children right in their own play area where they feel safe, secure and familiar with their natural environment. This truly encourages each child to build upon his or her strengths as the therapist provides treatment techniques to help them to achieve individual therapy goals.

TECHNOLOGY

At Shining Star Therapy, we don't just value children; we also deeply value our therapists. We find that our therapists are able to perform their best work when they feel happy, supported, and free from bureaucratic paperwork. That's why we're committed to investing in the latest technology to help our therapists manage their notes and tasks efficiently so they can focus more of their energy on investing in children.
